Further Developments in Fractals and Related Fields: Mathematical Foundations and Connections (Trends in Mathematics)

By -

Birkhäuser. Hardcover. Book Condition: New. Hardcover. 288 pages. Dimensions: 10.5in. x 2.4in. x 0.1in. This volume, following in the tradition of a similar 2010 publication by the same editors, is an outgrowth of an international conference, Fractals and Related Fields II, held in June 2011. The book provides readers with an overview of developments in the mathematical fields related to fractals, including original research contributions as well as surveys from many of the leading experts on modern fractal theory and applications. The chapters cover fields related to fractals such as: geometric measure theory, ergodic theory, dynamical systems, harmonic and functional analysis, number theory, probability theory. Further Developments in Fractals and Related Fields is aimed at pure and applied mathematicians working in the above-mentioned areas as well as other researchers interested in discovering the fractal domain. Throughout the volume, readers will find interesting and motivating results as well as new avenues for further research. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Hardcover.
