Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1919 Excerpt: .plants has been known to electrical engineers for years, and after the war it became ordinary newspaper comment. As a result, the authorities decided that the country had had enough of wasted coal and man-power and the present policy is to build super power houses equipped with units of 25,000 kilowatts, or larger, which will serve whole counties and large industrial areas. Also the coal is to be properly utilized and its valuable by-products recovered. H. E. Randali,9: I have spent a little time on this question of municipal or government ownership, and I would like to bring to this meeting an idea a little bit different. The feeling that I get from listening to this discussion is that it is all wrong. Well, Consulting Engineer, New York City (formerly of England). General Manager, Lyudlum Electric Furnace Corporation, New York City. (Died October 21, 1918.) may...
